Pamela Arthur, Associate Editor

HOW TO SAVE YOUR SKIN

(by G aston BURRIDGE, BSRA)

There is little question that the amount of deadly background gamma radiation is steadily rising over the Earth. Some of this increase comes from present stepped-up sun spot activity. This activity appears to flow and ebb in a little over 11 year cycles. Other of the increase is indicated as coming from added volume of Cosmic radiation our Earth is receiving. This may or may not be tied-in with the greater solar activity. Man can do little about these causes of "black gamma"!

However, by far the greater amount of radiation comes from man's own "fiddling" with a process of "atom transmutation" about which he knows precious little. That little is precious because if he does not stop he will be laying the ground work for human idiocy for unknown generations to come! It does indeed appear this present generation firmly believes - and is diligently acting upon - that half-humorous, half-tragic old saying, "To hell with posterity, it never did anything for me!"

Very likely man can cope with the multitude of misshapen bodies, the halt and the blind, the rubber-boned and the running sores our foolhardiness will surely make, but will he be able to cope with the misshapen minds which will tease and tantalize those bodies?

Though we may be presently able to run away from radiation, we cannot run for long, run far enough, or dodge quickly enough after we get there to make any difference. We have to face it ultimately - and soon. We might as well do it now - and stop this "waste of the future". There is not one sane basis for anyone continuing any further nuclear testing!

Present news indicates strongly that Russia's recent nuclear testing met with an accident of gigantic proportions! What the accident was, or how it came about, we do not know at present. Russia is mum. Our own people are playing "shut mouth" for obvious reasons, and the Geiger counters have gone crazy with their "clickety-clacking". Whatever happened in these latest Russian tests, we know they were extremely "dirty" - dangerously dirty even at California's distance away. So what must they have been closer home?

Early April rains in California could almost click without a Geiger counter from the Russian fallout! This fallout "junk" will be in every vegatable and fruit we eat, in every sip of liquid we drink, from here on out as long as we live! Our ears may not ring, our noses may not bleed, our eyes may not water - but Brothers and Sisters - we got it!

As the old vaudeville comic used to say, "There is no use crying over "spoilt" milk, no matter who left the refrigerator door open!" So now, is there anything else we can do beside stopping this "raving-mad insanity" of nuclear testing? The answer appears to be, "Yes"! And it is a very simple answer, too. One word, in fact. Vitamins!

Before proceeding farther I would like to make my own position clear. First, there is only a limited amount the proper use of vitamins can do toward warding off the affects of radiation, or toward bolstering the human machine against the attack of gamma rays, and that amount is not definitely established as of now for any individual.

Each of us is differently constituted. "One man's victuals are another man's poison"! Therefore, it must necessarily be an individual task, incumbent upon each separately, to determine how he fits into the picture, or how this picture fits him. But generally speaking, aid does lie in the vitamin direction.

Second. I heartily agree that vitamins obtained "naturally" - those in natural food stuffs - are far superior to manufactured ones. But we must also be sure the natural varieties have not picked up, and carry, some of the very same radiation which we are attempting to overcome and combat. A Geiger counter will, of course, tell the story. But Geiger counters are expensive instruments to buy and use, requiring some "interpretation" for best results. While I am not a believer in "coal tar products" for constant human consumption, one often has to choose between evils - and as a consequence, be dissatisfied with the choice!

Third. I have no personal interest in any concern which makes, processes, or sells vitamins, or like products. There is a magazine called "Prevention", which is nationally distributed. This magazine carries advertisements of may distributing firms selling all types and grades of vitamins. I believe these firms sell reliable products.

Fourth. Any formula, or part thereof noted herein, is only suggestive - something to try. It is against the law to prescribe anything for another to consume unless the prescriber be a medical doctor possessed of proper license in good order. I am not such a person. If you are so inclined, by all means get your doctor's opinion on anything - or all things in this article!

Fifth. While I do heartily recommend you read the little book, "All About Radiation", put together by Dr. L. Ron Hubbard, Box 242A, Silver Springs, Maryland, for the information it contains on this vital subject, there are some changes I think should be made in his formula given there. These changes I will suggest without giving the complete formula. This because, the above mentioned book, and hence the formula, is copyrighted, and I do not have permission to quote it.

Dr. Hubbard says his formula, which he names "Dianazene", will "run out radiation", and will guard against it "in some degree". He also claims, when used dail several other interesting "cures" have come from it. This information one should read in full. It should not be paraphrased here.

The first item in Hubbard's formula is "nictonic acid", which is "niacin", A daily dose of 200 milligrams is called for. From what I can learn, there will be many who will react to this quantity of niacin - at least at first. They will "flush" - appear as if sunburned. They will feel "prickly" all over. Thus, it might be well to approach this quantity of niacin gradually, say over a month.

The fifth item in the formula is Vitamin C, or ascorbic acid. Dr. Hubbard gives a daily dosage in his formula as 200 to 500 milligrams. I believe this amount is far too low! I take 2500 milligrams of ascorbic acid a day - and have for several years!

Vitamin C is an excellent "cell maintainer", therefore a good heart and blood strengthener. Vitamin C is not stored in the body. It is immediately spent in any work it performs, so needs constant replenishment. Any known toxic dose of "C" is not recorded. As much as 250,000 milligrams have been given at one time without any ill affects!

There are two kinds of vitamin C - ascorbic acid - and a natural "C" complex containing lemon biflavonoid, rutin and hesperidin. The natural product is more expensive, but contains materials straight ascorbic acid does not. I take 200 milligrams a day of natural "C".

Dr. Hubbard says his formula should be accompanied with milk and chocolate. I do not object to the milk, but do object to the chocolate. You will find very few who have studied human foods recommending any chocolate at all! Not only is sugar as poison to humans as to a horse or dog, but we make it doubly so by coating it with chocolate. I would be much more inclined toward brewer's yeast or wheat germ.

We are not yet "hopelessly radiated", but as the sun dial says, "It is later than you think!" Two more years like the last two years and the sun will be casting two green shadows across the dial's face!

How to save your skin - and your bones too - is getting more interesting by each tick of the clock and the click in the earphones!

* * * * * * * * * * *

VOICE OF THE YADA *

In connection with the recent Russian bomb disaster, some of the facts are as follows:

The bomb was of exceptional size and power, and was suspended - was not detonat under earth or water. It was fired purposely with design of testing the amount of fall out; but this fall-out was much greater than had been expected.

This mistake was due to an error in calculations and damage due to fall-out was extensive. The air-currents also had not been correctly calculated.

One important result will be to undermine the Russian pretense of having discontinued all the bomb tests.

A Note as to remedy and precaution: NIACIN will be used as an internal medication, subsequent to exposure to harmful radiation.

A Note as to Causes of Cancer: Cancer is a glandular imbalance. Certain cells are undernourished or not nourished at all, and these attack other cells. This is a question of the right kind of food, of nutritional values. A complete metabolism test should be made in each case to determine the required diet.

SEANCE MEMORANDUM # 10: has just been re-mimeographed and is now ready for release. This is a 33 page brochure, deep trance mediumship of Mark Probert, Inner Circle Controls. This is available from BSR Headquarters, while the supply lasts. Price $1.25

* THE YADA is perhaps the best known of the trance Controls of a celebrated medium, Mark Probert of San Diego.

"The Pyramid of Gizeh"

(by Rev. V. L. Cameron)

Several years ago I began investigating claims made by many researchers, in the Borderland Science Publications and several English magazines, of strange properties and powers possessed by even tiny replicas, some of which were reported to be of cardboard and only a few inches square, yes square; many have the impression that the Great Pyramid is triangular. One man in England claimed to have used a safety-razor blade fifty-seven times without sharpening, simply by placing it under a little Pyramid between shaves; the Pyramid apparently having some strange preserving effect, but there were many opinions as to how it was accomplished. Another said he had used the same blade for two years, but failed to say whether he had made any attempt at sharpening or how often he had shaved.

Others told of preserving meat, insects, small animals, etc., by the same means. One account told of spoiled meat filled with maggots being placed under a little cardboard pyramid which had a little cellophane window in one side; the maggots immediately left the meat and tried to escape, but almost immediately died, piled up around the edge of the pyramid.

The recommended proportions were on the ratio of 25 to 24 - I took a sheet of stiff cardboard, and setting a pair of dividers (compass) I inscribed a 6 inch circle, twenty four quarters of an inch. Then, setting the compass with the points $6\frac{1}{4}$ inches apart (twenty-five quarters) I stepped off 4 consecutive spaces around the rim of the circle, marking the points carefully; then from these 4 points I marked lines to the center, and other lines across from point to point around the rim. I cut the cardboard on these latter lines, and with a razor plade creased the other, radial lines to permit bending. Now I cut out the large segment of the circle remaining, cutting on the two outside radial lines to the center, and bending on the creased radial line at a right angle, the odd-shaped piece of cardboard formed a pyramid $6\frac{1}{4}$ inches on each of the four sides, and 6 inches on the diagonal corners to the apex or vertex. I used paper or cellophane tape to bind the two edges where they came together on a corner, both inside and out. I made others 3 1/8 by 3 inches. Now, placing one of the smaller ones over a cheap Gillette safety razor blade (thin blade) after shaving with it, I left it until the following day, when I used the blade again, and again replaced it under the pyramid. At first, I was very careful to orient the pyramid, keeping one side facing due north, but later I abandoned this practice and made no further attempt at orientation. Each day I kept up a running commentary on the action of the blade, as, for instance: May 28th, fine - May 29th good - then perhaps May 30th poor - and then the next day I would mark it "Best shave ever," or "Good as New". This kept up until I was getting very tired of the experiment, as I shaved every day and it was getting monotonous. Sometimes I was away from home for two or three days and would leave the blade out from under the pyramid during that time. Finally, on the 139th shave it was poor, and on the 140th it failed. This is a world's record as far as I know.

During this time, and afterward, I placed about a 2 ounce piece of raw beef under one of the pyramids; in about 5 weeks, in the bathroom and under all kinds of temperature and moisture conditions it was completely mummified. I carried it around for about a year in my suitcase on lecture trips, and on being challenged to eat it if I said it wasn't spoiled, I stripped off pieces and ate them until a mouse or something finished it off - it was excellent jerky except for salt.

A piece of raw pork, half fat, also mummified, and a glass of milk turned to cheese, which I ate a month later. Later I built a 25 inch by 24 inch pyramid of aluminium, which has other strange properties I will relate in a later edition.

(The author and inventor of the Aurameter, the Rev. Verne L. Cameron, can be addressed at Route 2, Box 526, Elsinore, California, or in care of BSRA).

SAUCER FRONT * * "MR. 'SCHMIDT' GOES TO WASHINGTON" -

(from THE LITTLE LISTENING POST at Washington, D. C., Vol 5 No 2)

Biggest sensation, saucerwise, is the story of grain buyer Rinehold Schmidt of Kearney, Nebraska, who "boarded a landed saucer there Nov. 5 '57, had ½ hr visit before it took off straight up, he then went white-faced to a minister (who wasn't home) then to the sheriff. He & hundreds of others went back & studied the site - up all night answering nationwide phone calls for 18 hrs. then, the report goes, after visit from two "top men", town officials changed their story & demanded Schmidt do same; on refusal he was "thrown in jail without a warrant - later socked into a mental hospital for 13 days." People over nation roused! When he got out (clean bill of health) he started suit then came to Washington to tell his story "on the Hill." Radio man here called it "rape of a man's rights!" Lawyer said a "top man" told him - "We've shut up 7000 people but we can't shut up that Schmidt!" Schmidt now touring country - Clubs want his story. Director of Washington Saucer Intelligence accompanied Schmidt right back to Kearney where two lectures were given. Just before 1st lecture saucers put on one-hr display in sky - everyone saw it, press & radio picked it up! Case known as "The Kearney Incident." Schmidt had 2nd Contact Feb. 5 during this "Space People" put following question to him which he scribbled a'top their instrument panel: "HOW WOULD THE PEOPLE REACT IF A FLEET OF THESE SHIPS WOULD LAND & TALK TO ALL PEOPLE ON A FRIENDLY MISSION? WOULD THEY ACCEPT US ON FRIENDLY TERMS?" (Is there any significance in fact that this took place in exact center of the U.S.? This question amounts to a "propesition" - what form of response will be forthcoming? * * * * * OVERALL PICTURE is that saucers are getting bolder (friendlier.) Nov. "Flap" brought pattern of stalled cars and more landings. This pattern continues. Theory is - they're conditioning us, researchers feel when the public mind is sufficiently prepared actual contacts will be made. This is what drives fans, worldwide, to work without pay. . . . . More landing stories continue to come in: Dover N. J. paper says man & wife saw ship land in woods, 3 dark shinned people hopped out, picked up something heavy (rock) & then whirred away with it. . . . In Central Brazil truck saw luminous object high up, brightness blinding, driver panicky, truck went dead, object came & hovered 20 ft. up, door opened, 2 beings appeared, then 2 more & again 2 more, then a 7th came in middle; looked human but hair was long, wore luminous suits - observed truck 3 minutes then took off, released small disc as they went straight up .... Another S. Amer. acc't says 2 peasants came on 2 UFO's on ground - saw 6 middle-sized men who hurried back into craft which then took off & air-displacement so great palm trees nearly lay on ground! . . . . . Many more clubs forming - Oakland, Frisco, Miami "one coming in Kearney & nearby Rock Island." - More engineers hovering around subject. Lecturer Dr. G. H. Holloway, 202 0 N.W. 7th, Miami asks saucer speakers to contact him..... (Report Dr. Mensel called last "flap" - "HOGWASH"!! - -

A PROOF OF RADIESTHESIA

(Translated and reproduced from SANTE' d'Abord, No. 22 with the permission of the Editor. From Radio-Perception Vol. XI No. 84 - June 1954)

During the German occupation in the last world war a farmer of Sauveur-de-Landremont in Maine-et-Loire, M. Pouvert, decided to bicycle to the neighbourhood of Chateaubriant in Loire Inférieure the following morning to buy a mule. Getting up when it was still dark, he left before dawn and was never seen again.

After several days his son, puzzled by his prolonged absence, notified the police at Ancenis, but in spite of their efforts and the use of a police dog brought from Angers no trace of the missing man was found.

Several months after his disappearance one of the missing man's sons, on the advice of an inhabitant of Landremont, proceeded to Cholet to consult M. Chouteau, the well known radiesthetist. He took with him a staff map of the locality concerned, a photograph of his father and a piece of the copper peak of an old cap of his father's. M. Chouteau made his examination and when the son returned some hours later to learn the result, told him that according to his findings his father was dead and his body was in the Loire above Houdon at a spot he marked on the map opposite a place called Folies Siffet. The young man returned at once to Saint Sauveur-de-Landremont with the information, but, as darkness had fallen, put off further action till the following morning.

Early next morning he collected a few local sailors and together they embarked on a boat on the Loire to search the spot indicated by M. Chouteau with boat-hooks. After a few minutes one of the sailors felt an object at the end of his boat-hook and dragged a heavy weight to the surface. It was a body which the sons recognised as that of their father, but terribly swollen by its long immersion.

Next day the worthy fellows sent M. Chouteau the following message which in its rustic simplicity is worth all the testimonials in the world:

Monsieur Chouteau,

Yesterday with the help of boat-hooks we found the body of our father in the Loire at the exact spot you had marked. Thanks to you he will have a Christian burial. * * * * * * * * * * * * * * * * * * *

EXCERPT FROM "THE COMING OF THE SPACE SHIPS" by Gavin Gibbons, published by the Citadel Press, 222 Fourth Ave., New York 3, N.Y., 188 pages May 1958 price $3.50

"There is another explanation of this power of appearing and disappearing at will. I myself think it very likely that U.F.O.'s are capable of dematerialisation. It is generally supposed that all consciousness is due to the matter observed being on the same wavelength as the person who perceives it. Sound is the result of waves of different lengths. Colour, too, is composed of waves, but of much shorter length than of sound. If it were possible to change to a different set of wavelengths, the life on Earth, as we know it, would be impossible. If the vibrations were radically altered, it would even be possible to co-exist in the same space as an object, an animal, or a human being. To be able to change this vibration artificially would be to possess the power of vanishing and appearing at will. It is clear that those who control or even fly in these strange craft have mastered this power - which is the only explanation of the things that observers such as I have seen." (page 49)

New York Saucer Information Bureau, P.O. Box 26, Planetarium Station, N.Y. 24, N.Y.

TO: All Flying Saucer Organizations

Gentlemen:

In trying to get a break-through on the Flying Saucer Story from our Government and the Air Force, NYSIB invites your organization to join in a concerted effort to deluge Congress with letters on the 4th of July, asking, not demanding, that the American People be given all the facts. Just to have people write to their Congressman haphazardly will only mean a few letters getting there every so often, without much action, if any at all. Using July 4th as B-Day, (break-through) we can have a coordinated plan of action and with letters coming in from all over the country, not too long before election time, it might just be the spark to touch off what we've all been waiting for. We, the people, are still the Government of the United States, a fact that seems to have been completely forgotten since the end of the last war, and if secrecy in Government is allowed to continue, we will eventually wind up the way other countries have, in complete dictatorship, If we are being visited by Extra-terrestial beings, and the evidence certainly points that way, then we have a right to know. The way that Major Donald Keyhoe was cut off the air, while he was giving the people some important information regarding a secret Senate committee at work right now, investigating secrecy in Government pertaining to Flying Saucers, is not the kind of thing the American People should take lightly. We have the right to know. Let's see to it that we do. NYSIB has a committee at work right now, finding out what the United Nations is doing about it, individually as Nations, and collectively. As soon as sufficient information is gathered, your organization will be forwarded the data.

Hoping you will do your part in the B-DAY PLAN, and get as many reporters and newscasters in your local area interested in it too, they can be of great help. We have two syndicated writers in NYSIB who are getting a campaign ready now, and if all the local publicity agencies have been briefed on the plan ahead of time, it will help insure its success.

MAKE THE BREAK IN '58

Very respectfully

Douglas Deane (Director: NYSIB)

* * * * * * * * * * * * * *

TO BSR DIRECTOR:

If you were a Guardian of the Earth would you take a chance on this:?

Page 211 of March '58 Missiles & Rockets states:

"One athoritative estimate concludes that within ten years Russia will have to launch 50,000 (fifty thousand) nuclear warhead missiles at varying ranges in order to knock out all the West's retaliatory bases, assuming a 10 megaton H-Bomb in each missile. Only a fraction of these would so poison the air with radioactivity as to destroy the population of the Soviet Union -- and everybody else in the world as well." End Quote. 10 megaton = 10 million tons of TNT

A pertinent inquiry, from Assoc. G.C.W.
of Sta. Barbara, Calif.

NOTE TO OUR READERS:

This might be an interesting historical item sometime - if our haunted decade survives as more than a fable and a hypotesis. The N.Y. Saucer Information Bureau (Box 26 Planetarium Station New York 24, New York sends it out.

"U F O-M A T I O N"

Listed below are four documents that MAJOR DONALD E. KEYHOE was not allowed to make public on the ARMSTRONG CIRCLE THEATRE UFO SHOW on Jan 22nd 1958. Though not deliberate censorship, strong Air Force pressure was used to have the documents deleted f from the script. Their contents are as follows:-

1. A Sept. 23rd 1947 secret conclusion by AIR TECHNICAL INTELLIGENCE CENTER (ATIC) that FLYING SAUCERS were real.

2. A 1948 top secret ATIC document concluding that the UFO'S were Interplanetary Spaceships.

3. A secret Air Force Intelligence analysis of UFO maneuvers, also concluding that the objects were Interplanetary.

4. A secret report by a panel of top scientists convened at the Pentagon in Jan 1953 which urged (a) that the Air Force quadruple it's UFO project, and (b) that they give the American people all UFO information, including secret Air Forde conclue sions, unsolved sightings and photo analyses. (These recommendations were OFFIC* IALLY REJECTED)

Loss of face might be the reason (no inferior fighting force ever wants to admit they are obsolete and out-dated) or more to the point, LOSS OF POWER. What would happen to the Air Force (it's already happening to the Royal Air Force in England, complete disbandment is in prodess now) in fact, all the Armed Services on Earth, if the Governments of the World got together (THE BIG MIRACLE) and openly invited these visitors to land and help us? The answer is, there would be no more need for the Air Force of any Armed Services, here or anywhere. A shocking situation for all the "let's have a war" boys! No wonder the women of this nation make up a big percentage of our Flying Saucer Clubs. Mothers, wives and sweethearts want HOMES, NOT BOMB SHELTERS.

* * * * * * *

"E = MC^2" : On account of the interest arroused by the dating of the E= M C^2 formula, Assoc. Gaston Burridge sends us the following comment. The only interest the BSR publications have in this matter is that of keeping the record straight for future historians.

"I have run down the Hasenohrl - Einstein E = MC^2 matter even more extensively than indicated by brother "Millard's" report in last RR. There is no indication of Einstein originating the equation. He did apply it to "nuclear energy"; Hasenohrl was applying it to "Radiations in Moving Space Cavities", which, of course, is very much an "ether" concept. Hasenohrl was upheld by Plank, Stefen and Grossman - and probably others, at that time - but Einstein got the notices for his application! It is all very interesting - and if an ether is definitely established as being present, I cannot guess what it will do to Einstein's work! Time will tell!

G.B.

EXCERPTS FROM LE COURRIERE INTERPLANETAIRE

(-- British Edition Markham House Press
31 King's Road London S. W. 3, England)

GERM MUTATION

Reports published in accepted medical journals and in the METAPHYSICAL DIGEST (the Journal of the Society of Metaphysicians) prove that mutation of disease germs can occur and, in fact, must occur in the 'natural' state before many years have past. A form of tubercle bacilli was irradiated with radioactive cobalt and produced the most virulent form of tuberculosis ever known to man. In spite of such final evidence, the mad powers continue to pour atomic wastes into the atmosphere of our earth. Russia has just exploded several more H-bombs; many new atomic power stations are being erected. Yet, no one has yet solved the problem of the disposal of radioactive wastes. Without the proper solution to this matter, and to similar aspects, there can be absolutely no question of avoiding world-wide disaster. Modern metaphysics would investigate the probability of world disaster before local gains in terms of the application of atomic knowledge to warfare and industry. Any delays or apparent national losses would soon be made good by the gains made by the correct humane applications.

WHAT IF THE MOON IS OCCUPIED ALREADY?

Leonidas SEDOV, the great Russian astronomer, had mentioned, when he was in Barcelona, at the International Astronautical Congress, that there would soon be a trip to the moon. Then, on the 16th. of last November, the Soviet professor, C. Stanioukovitch, declared 'A day will come in a few years time when an artificial projectile will succeed in reaching the moon.' Already on the 4th. October, 1957, another Professor, M. Poloskov, had made the following important declarations, "It is not certain that man will ever arrive by rocket at the moon". He added, however, "In the first place, in five years or a little later, perhaps, a rocket without instruments will be directed towards the moon which she will circle before returning to earth. This will give us information about the side of the moon which has never been seen from the earth."

Satellites already launched have corroborated the existence of layers of gas between the earth and space. The launching of the two satellites produced much more technical knowledge of the problems of travelling to the moon. We must not minimise the numerous astronautical observations which were made in the whole world before the 4th, October, 1957. But it is so evident that our first steps into space have attracted the attention and awakened the uneasiness of the beings who inhabit the moon!

On the 10th. Nov. last, M. James Morrow, of the Meterological centre of Abilene, U.S.A., has affirmed that he was, at 2.50 a.m., French time, in a line with the moon, a red-orange light. It was followed by a flash which lasted 45 seconds. Neither the Russians or the Americans had sent anything in that direction during the night. Then who? On the 11th. last November, information coming from Norway and Holland, stated that a new body was moving in the sky and there were new radio signals. A luminous object bigger than a star was then seen travelling towards the south-west, over Oslo. This was several hours before 'Sputnik' was expected. The observatory of the Hague has reported an unidentified object. An official of the Dutch Navy,

and a captain of a boat, have both reported seeing a brilliant ball of light, looking like a 'florin', at a great height, and listening posts picked up new signals on the same frequency as 'Sputnik No: 2'. These signals were longer than those of the satellites. Who was it?

ABOMINABLE SUBMARINE MAN ?

London Sept. 11th. (F. S. Dep.). After the 'abominable snowman'... 'the abominable man of the submarine depths.! According to Dr. Anthony Laughton, of the Institute of Oceanography, such a creature exists. In the course of the annual reunion of the British Association for the Advancement of Science, he showed yesterday some photographs taken off the coast of Ireland by a submaring camera at a depth of more than 4,500 meters. One can see in them quite plainly the print of feet belonging to an unknown creature.

SECRET BASES OF THE U.F. O.

Night lies deep and calm over the sea. On board a small vessel, made by man and known as a freighter, the crew is peacefully mounting guard. Suddenly, the night becomes like day! Surging up from the depths of the sea comes a luminous 'wheel' - fantastic, immense, and of terrifying aspect! It shoots up over the vessel, whose crew is petrified with fright. A sulphurous smell spreads around, while it plunges again into the waves with a terrible roar, sending up steam.

No, this is not from a science-fiction film, It is something which really happened, not once but several times, according to the Maritime Annals. It is only now that the significance of these phenomena appears. It is evident that such incidents have occurred since 1947. Research into ancient witness shows that similar 'wheels' have been seen in the Persian Gulf, the Straits of Malacca, the China Sea, the Mediterranean, in the Central Pacific, off Japan: in the New World, the Carolinas, Mexico and California. It is reported that certain among them have entered into collision with vessels. Charles Fort suggests they could be 'super-constructions. I think he is right. Examination of submarine charts reveals the existence of excellent hiding-places in the proximity of these places of appearance. There are canyons more than four miles in depth, where these UFO's could have bases in the depths of the oceans! They are - the Basin of Mexico, and the Chasms of Caiman, of Porto-Rico, (all in the Atlantic) and those of the Philippines, of Japan, of Riou-Kiou, of Bonin, and best of all, the chasm of the Marianas in the Pacific. Is it not strange that the 'wheels' should be seen in the proximity of these depths? I think the UFO's traverse space and that they then assemble at these bases. Note the interest in these same regions recently evinced by scientists studying the depths of the ocean. Is it just one more coincidence? I shall end this brief article by recalling the fact that the compasses and instruments of planes and boats no longer function correctly off the Carolinas! (a very large number of reports have established this) I think that the UFO's assemble there also at the bottom of the ocean, and that these regions would be well worth the trouble of careful exploration. All these objects (Unidentified Submarine Objects) are not Russian submarine - above all, those which rise up out of the water! *

- -

* A considerable amount of data could be collected, about UFO's entering the sea, and the Mark Probert Controls have pointed out, impatiently, that any object in the right stage of 'mat and demat'can enter the sea or earth itself, or any other desired medium at will, by conversion of (etheric) frequencies... We repeat once more, for the hundreth time during the last ten years, that the essential nature of the UFO's is known and available to anyone who can read. ML

SPACE CRAFT DIGEST** (Spring Issue, 1958. Published by The Pacific Lemurian Society. P. O. Box 768; Salem, Oregon. Founded by W. Gordon Allen, a Naval Radar officer in World War II, presently owner of eight commercial broadcasting stations. Mr. Allen combines an active interest in historical problems (of Lemuria), in metaphysical concepts, and the founding of an Astrophysical Center. The DIGEST is a printed 'slick paper', profusely illustrated publication of about 30 pages, without fiction or sensationalism -- except that its content is in itself often sensational beyond words. Perhps the best we can do here is to quote a few headings and topics.

Comments on Bulletins, news items etc. -- Confidential Bulletin of the NICAP (full page quotation) --- Truth about US missile failure ---Space Craft bulletins from around the planet --- Poltergeist phenomena --- "Lunar Traffic items for 1957 --- Photos of Lunar craters --- The pigmy moon spirit (first publicised in USA by BSR publications) --- Luna as Base for space travel (the Probert Controls have repeatedly affirmed that this has gone on for centuries)...

How the Saucers Fly: One must discard the conventual idea of the atom. Sir Isaac Newton was right in Space as an absolute ... There is an all-pervading Ether or Field --- the vortex atom, the neutrino, the ether pump, the Trent UFO --- The Krafft Ether Vortex Theory (repeatedly publicised by BSRA: pur journals have printed many articles by Dr. Krafft) --- The British ZETA ---the principle of resonance --- the wave-particle paradox --- Shell material --- Gravity as proton-attraction (vs Einstein) --- The Sputnik deflections ---

"Interpretation of fundamentals is steeped in out-of-date dogmas"

Drawings of atomic structure, after Krafft.

A New Vista of the Entirety (to follow Bell Aircraft Bul. 98-001.

Gravity not a fundamental field --- Life force --- the Odic field --- Gallileo --- the Nutrino as fundamental to ALL material existence --- the doughnut universe ---De La Warr and his thought resonator --- Reichenbach-Mitogenetics - Abrams -- Ruth Drown -- Thought photographs, diagnosis and treatment at a distance.

To think of an object is to tune in to that object in the person's mind --- Distance is no barrier to thought... Radionics is in its amazing infancy ... Mind and Matter journal (De La Warr --- the pineal gland, and thinking)

Principle of Uncertainity - Heisenburg - "Reality" as illusion - the Lemurians - the Emerald Tablets.

For 6 mo. rate, trial membership in Lemurian Society, inquire at address given in paragraph 1, above.
